WHY choose PLAYCO Products?

- We never use FRP material in our Product Range. Our Products are made of LLDPE material.

Linear low density polyethylene, or LLDPE, is commonly used in rotational molding.

A competitive approach to plastic manufacturing, the process consists of introducing a Polyethylene powder into a hollow, shell-like mold. The molds are held by a machine arm that is engaged and sent into biaxial rotation, at relatively low speeds. As the polyethylene powder gets heated, it forms a thick layer against the mold surface. After the cooling phase of rotation, the product can be removed from the mold.

It is highly Durable comparing to FRP material.

It has High tensile strength. Wall thickness will be 8mm.

It is made by eco-friendly material, anti-static and anti-ultraviolet and non-toxic,

It makes us to create a high quality outdoor playground to our Children's.

- All the metal parts are made of galvanized steel pipes with diameter of 114mm, 60mm, 48mm, 38mm, 32mm, 28mm and wall thickness of 2.2mm. Quality and technical standard meets the requirements of EU standards.
- High Quality Polyester Powder coating.

All metal parts completely acid washed, surface treated and coated with Polyester powder coating gives bright elegance look and smooth texture finish for the metal parts used in our playgrounds.

- All fastners are sealed with specially designed polyethylene bolt caps ensures children's safety aspects at the time of Playing.
- We have earned ISO certification for our quality management system.
- We always keep our words to deliver the products on time.
- We provide END to END solutions right from choosing the perfect equipment according to your space and budget constraints to finally installation of high quality outdoor playground equipments at your site.
- All our playground equipments comes with one year warranty, after that AMC will be provided to maintain the equipment.

OUR MOTTO: WE KEEP CHILDREN "**SAFE AND FUN**" WHILE USING
OUR INDOOR & OUTDOOR PLAYGROUND EQUIPMENTS.
