QUALITY & SAFETY

QUALITY:

We only use the best equipment IMPORTED from all around the world. As our playground and park equipment are used by the young and old, We earned ISO 9001:2008 certification for Manufacturing and safety organization to create a standardized quality management system that is constantly monitored to ensure it to confirm the principles of continual quality improvement and customer satisfaction.

MATERIAL SPECIFICATION :

PLASTIC PARTS:

Made from imported LLDPE (linear low density polyethylene) with automatic rotate plastic machine, anti-UV , anti-static , anti-crack and used more than 10 years. Rotational molding of LLDPE, the exclusive material for rotational molding imported from the South Korea. With a wall thickness of above 6mm. Innovative design and bright colors. Easy to assemble.

METAL PARTS:

Made in the national standard steel pipe, galvanized, welded by the professionals, strong and smooth.

PLATFORMS:

We use automatic punching machine. Our Platforms are skid-proof & water-proof. They are also powder coated to prevent rusting. Platform: 2.2 mm-thick cold-roll steel sheets, with bores of 6 mm in diameter. Conforming to the European standards of EN1176.

PAINTING:

Metal Parts are completely powder coated with PP powder with standard bright colours. Eco-friendly material. Anti-static. Anti-ultraviolet and non-toxic.

SAFE PLAYGROUND :

A safe playground is, fundamentally, one in which the likelihood of children getting hurt is minimized. Good design, safe equipment and sufficient safety surfacing all go into making a good, safe playground for children. One of the best ways to keep kids safe is to choose super-durable equipment and keep it properly maintained.

Sharp corners, worn finishes, gaps in the play events and lack of safety surfacing can all cause injuries. And they can all be easily avoided with a bit of playground maintenance. Playco gives full assurance on the safety side.
